However, the cost benefit analysis of the input and output of these efforts is not available in a holistic manner. It has been observed that the country has definitely progressed during the last 55 years of independence but it is also true that the gaps between various sections of the society are increasing day by day. *The parameters, indices, data and statistics to measure input-output, gap between haves and have not, is not available. The major aspect of people's participation in their own development is seen missed out. To address these issues and prevailing social reality, Director General, BIPARD to establish a dedicated and exclusive Centre for Social Enterprises Management in Government of Bihar apex and premier training institute, BIPARD.*
