Centre for Good Governance

Good governance is a means to achieve the goals of development and also to strengthen the democratic system. It ensures public-private partnership in business, enterprises and governance. The major stakeholders of good governance are government, public sector, private sector and civil society including political parties, NGOs and media. Transparency through ensuring right to information to the citizen, accountability and least scope for corrupt practices are the signs of good governance. In fact, good governance is not only a means but it has become an objective too for the governments now a days.

The centre develops training materials and conducts training courses for government officials at different levels from time to time.
